   3.1. Water Conditions Update. General Manager Wegley explained that April-July runoff for the Kings River could vary from 3.24 million acre-feet (MAF) to 3.50 MAF, which may allow the District to break the days-on record of 247 days, first set in 2017. General Manager Wegley also reiterated how reoperation of the system and implementation of the functional aquifer recharge management program – both initiated in 2017 – resulted in increases of nearly 40% and 30% for days-on and calendar year headgate diversion, respectively, over historical operations during "wet" hydrologic periods. Water conditions this year may yield new records for both days-on and calendar year headgate diversion. Water Conditions report was added as an addendum to the minutes. (Insert 3.1)
